< Current Work />

2016 - present

Senior Javascript Front-End Developer

GEORGETOWN UNIVERSITY

- Building custom Gutenberg blocks and WordPress plugins for specialized functionality using React, JSX, and PHP.
- Converting the university's Drupal themes into WordPress using HTML, Sass, and Twig.
- Developing custom Javascript functionality for individual department websites.
- Built responsive and accessible Drupal 7 themes for the university's school and department sites using HTML, CSS, Bootstrap 4, Javascript, and PHP.
- Led the university's accessibility development efforts during an OCR review in 2017.

2015 - present

Founder and Lead Developer

THAT DEV GIRL

- Working with both large and small businesses to build website and application UIs, specializing in creating dynamic and responsive themes for WordPress and Drupal, using HTML5, CSS, Javascript, and Bootstrap.

Joni Halabi

Senior Web Developer and Instructor

< Conference Speaking & Teaching />

- *Front-End Web Development* 10-week class at General Assembly (March 2016 - June 2016)
- *Front-End Web Development* 10-week class at General Assembly (December 2015 - March 2016)

< Previous Experience />

2015

Lead Web Developer

ATLANTIC MEDIA STRATEGIES

- Led and grew the web development team by establishing project workflows.
- Created a development resource library containing base themes and reusable custom libraries and WP plugins.
- **The Chicago Community Trust:** Lead developer on a project to develop a new responsive website in WordPress. The site released in May 2015 and won the 2015 OMMA award for website excellence.

2009 - 2014

Senior User Experience Developer

OPTAROS

- Worked with creative and back-end teams to develop user-focused client e-commerce sites.
- **Macys:** I re-platformed the product management application UI as a Backbone app, with Marionette and Jasmine. I also worked with a team to launch a company-wide core UI platform in Backbone and jQuery UI.
- **Stella & Dot:** I localized their online shop for the European market and redesigned a significant part of the site's stylist order creating workflow. Development work was done in Magento, using CSS, jQuery, and Prototype.

Joni Halabi

Senior Web Developer and Instructor

2004 - 2009

Web Content Engineering Manager & Translation Manager

CAMBRIDGE INTERACTIVE DEVELOPMENT CORP.

- Maintained all company and product websites and app UIs. Directly managed front-end web content engineers.
- Created the company's localization department. Set standards used by this department for all copy localization.
- Managed the translation process for all website and software copy in over 15 written languages.
